OIKOS

Supported by:

Federal Ministry
for the Environment, Nature Conservation
and Nuclear Safety

European
Climate Initiative
EUKI

based on a decision of the German Bundestag

Inspiring young people in Italy and Albania to adopt sustainable lifestyles and to advocate for them in local politics.

"Children Stand UP" project aims at strengthening dialogue between Italy and Albania on Climate Change.

Our target beneficiaries:

Children and youth

Teachers and Educators

Local Government Officers

- ⇒ Beneficiaries will improve their knowledge on Climate Change, will become actors of change implementing concrete actions and disseminating key messages for positive change within their communities.
- ⇒ Exchange of experiences and good practices will be fostered with the support of digital platforms and face to face meetings building a strong relationship among beneficiaries in both countries.

Our work will focus on:

- ⇒ Children education and promotion of best practices
- ⇒ Concrete actions and collection of evidence
- ⇒ Promotion of change in Climate Change policies in Albania through child participation

Our Target areas:

2 Municipalities in Italy

4 Municipalities in Albania

Our aim and impact ambition

- ⇒ We will positively raise awareness on climate change of youth and general population in Albania and Italy and build networks connecting youth groups and schools in both countries. In the long-term youth will become adults who actively care about nature, act against climate change and advocate about issues that will advance the social and economic issues of their generation.
- ⇒ Through the work with Municipalities and the Ombudsman in Albania, we will enable a favorable environment for a climate change related discussion that will take into consideration children voices and climate change impact on children rights for policy definition and implementation at local and national level.

Our expected results:

- ⇒ Improving teachers' competences and providing quality environmental education program based on improved knowledge and tested methodologies and tools;
- ⇒ Creating opportunities for knowledge sharing of such information between students and teachers in Italy and Albania;
- ⇒ Enhancing students' engagement, which will translate in performing eco-actions;
- ⇒ In Albania, we will work to promote an institutional environment open to child participation and aware of issue related to climate change.

Our main actions:

- ⇒ Increase knowledge on Climate Change through tailored environmental education programme in schools in Italy and Albania involving children and their teachers.
- ⇒ Concrete eco-actions are realized in 3 schools in Italy and 4 schools in Albania to reduce their environmental impact and producing evidence.
- ⇒ Strengthen capacities and increase knowledge on Climate Change for 4 Albanian Municipalities and the Albania Ombudsperson officials.
